## audience reviews

*Metamorphoses, Woodcreek High School*

**Review:** This play is extremely well done and it was totally not what I had expected it to be it hit all of your emotions from funny all the way to having tears in your eyes. This play is trully in itself a unique experience because it's not everyday that you see a giant 2,000 gallon pool of water on your High school stage or any stage for that matter. I would suggest that everybody should come and see this faboulus performance by such a talented group of students
